It's All About That Resilient Spec: Choosing the Hard Surface Products For Your Project

IDCEC Course# CC-118727 Designation- General

AIA Course# ARS01 Designation- General

Course Credits:

1.0 CEU / 1 LU

Course Description:

It Is All About That Resilient Spec is a great introduction and exploration of various types of commercial resilient products. In order to specify the right product for a space, an understanding of resilient constructions and their attributes is necessary. Learn about resilient factors of performance, and how understanding the project, combined with resilient knowledge, will lead to specifying the perfect product. We'll discuss scope, time frame, usage, aesthetic, maintenance, and sustainability and how each of these topics contribute to the overall success of a project.

Course Objectives:

1. Learn the basics of resilient construction
2. Identify different types of resilient flooring
3. Understand resilient factors to consider when specifying on a project.
4. Apply the knowledge of resilient to better understand the best resilient option for a space.
